

SHIV CONSTRUCTION LLP

Building Strength Since 1988

OUR LEGACY

Shiv Construction LLP, established in 2025, stands on a strong foundation shaped over decades by its predecessor firms — Raghuvir Buildcon and Siddharaj Projects — both founded and led by the previous generation of leadership.

These companies played an instrumental role in executing landmark irrigation projects like canal, dam, road, and infrastructure work across Gujarat and other regions of INDIA. They delivered projects of significant scale while building a reputation rooted in integrity, technical excellence, and long-term client trust.

Siddharaj Projects later undertook and successfully executed major dam and canal modernization works, completing the projects fully — both physically and financially — demonstrating exceptional capability and project management strength.

This rich experience, built steadily since 1988, now converges into a unified, modern, and strengthened entity — Shiv Construction LLP — carrying forward the same vision, values, and engineering excellence while expanding capacity for larger, more complex infrastructure development.

OUR JOURNEY

1988 Legacy of experience begins with Raghuvir Construction.

2009 Siddharaj Projects is established.

2025 Shiv Construction LLP is formed.

OUR JOURNEY IN BRIEF

1988: The Beginning of a Legacy

The foundation of our engineering and construction legacy begins in 1988, when the previous generation of leadership started undertaking irrigation, canal, and infrastructure works. These early years built the core values we still follow today — integrity, dedication, and a commitment to quality-driven execution.

2009: Siddharaj Projects is Established

With growing experience and increasing project scale, Siddharaj Projects was formally established in 2009.

The company took on significant irrigation and canal works across Gujarat and other regions of INDIA. Steadily expanding its capabilities. Over the years, Siddharaj Projects earned a reputation for delivering projects with precision, technical depth, and strong financial discipline.

This firm later executed major dam and canal modernization projects independently — completing them fully, both physically and financially — further strengthening its credibility and capability.

2025: A New Chapter: Shiv Construction LLP

In 2025, the rich legacy of Raghuvir Buildcon and Siddharaj Projects converged into a unified and forward-looking entity — Shiv Construction LLP.

With decades of experience behind it, Shiv Construction LLP was formed to scale operations, take on larger and more complex infrastructure projects, and bring together the expertise, systems, and engineering excellence built over generations.

Today, the company stands positioned for strong growth in irrigation, canal works, dam construction, road infrastructure, earthwork, embankments, and comprehensive infrastructure development.

OUR CAPABILITIES & STRENGTHS

Technical Expertise Across Diverse Projects

- Experienced in irrigation networks, canal lining, dam works, embankments, and major infrastructure development.
- Proven capability in executing complex civil engineering works under challenging terrain and timelines.

Strong Engineering & Project Management Foundation

- Decades of on hand experience inherited from Raghuvir Buildcon and Siddharaj Projects.
- Efficient site planning, quality control systems, and resource optimization.

Reliable & Consistent Execution

- History of completing projects both physically and financially to full satisfaction.
- Demonstrated ability to handle large-scale, multi-phase government and infrastructure assignments.

Reputation Built on Trust & Integrity

- Long-standing relationships with government departments, consultants, and stakeholders.
- Transparent work approach and commitment to ethical business practices.

Capability to Deliver Value Beyond Specifications

- Focus on durability, sustainability, and engineering accuracy.
- A problem-solving mindset that ensures smooth execution from foundation to completion.

Dedicated Team & Evolving Capacity

- Skilled manpower backed by modern equipment and method-driven execution.
- Continuous upgradation of systems and techniques to meet modern infrastructure demands.

OUR STRENGTHS

- Deep-rooted expertise across irrigation, dam, canal, road, and infrastructure projects.
- A legacy backed by successful execution since 1988.
- Proven capability in handling large-scale government and infrastructure contracts.
- Strong reputation for honesty, transparency, and financial discipline.
- A commitment to engineering excellence and modern project management.
- A blend of traditional experience and new-age execution practices.
- Robust problem-solving ability in challenging site and project conditions.

OUR VISION & MISSION

Our Vision:

To strengthen India's infrastructure landscape by delivering engineering-driven, sustainable, and high-quality construction solutions — while upholding trust, integrity, and long-term value in every project we undertake.

Our Mission:

To execute irrigation, canal, dam, road, and large-scale infrastructure projects with precision, technical excellence, and uncompromised quality — ensuring on-time delivery, strong project governance, and enduring stakeholder satisfaction.

OUR EXPERTISE, SERVICES & ADVANTAGE

CORE EXPERTISE

Irrigation Projects :

Execution of large- and small-scale irrigation systems, distributaries, minors, sub-minors, structures, and canal networks with high precision and quality control.

Dam Construction & Rehabilitation :

Construction, strengthening, and modernization of dams with specialized concrete works, embankment development, spillway structures, and hydraulic engineering.

Canal Lining & Modernization :

Expertise in cement concrete lining, repairs, desilting, and improvements for major and minor canal systems to ensure efficiency and durability.

Road Construction :

Development of rural and urban roads, approach roads, internal roads, and infrastructure connectivity works using durable construction practices.

Earthwork & Embankments :

Bulk earthwork operations, embankment formation, excavation, backfilling, and land development using advanced planning and machinery.

Concrete Works (All Types) :

Execution of structural and non-structural concrete works for canals, bridges, culverts, retaining structures, and heavy-duty infrastructure.

Infrastructure Development :

Execution of multi-disciplinary civil infrastructure works for government, semi-government bodies and private sector.

SERVICES WE OFFER

- End-to-end project planning and execution.
- Technical surveys and site assessments.
- High-precision concrete and structural works.
- Earthmoving and mass excavation solutions.
- Hydraulic structure execution.
- Quality assurance & control systems.
- Material management and logistics handling.
- Engineering supervision and project monitoring.
- Compliance with safety, environmental, and engineering standards.

WHY CHOOSE SHIV CONSTRUCTION LLP

Proven Legacy Since 1988

Backed by decades of hands-on engineering and project execution excellence inherited from Raghuvir Buildcon and Siddharaj Projects.

Strong Technical Competency

Expertise in handling high-value, large-scale irrigation and infrastructure works with accuracy and speed.

Commitment to Quality & Safety

Strict adherence to quality specifications, safety protocols, and government standards.

Reliable Execution Track Record

Projects consistently completed on time — both **physically and financially** — showcasing strong planning and delivery strength.

Transparent & Ethical Work Culture

Long-standing reputation built on trust, integrity, and professional conduct with clients and stakeholders.

Skilled Workforce & Modern Machinery

Dedicated teams supported by machinery capacity, ensuring stable, efficient, and continuous site operations.

Capability for Large & Complex Projects

Well-equipped to take on challenging infrastructure assignments, with a solution-oriented execution approach.

OUR TEAM & MACHINERY STRENGTH

OUR TEAM & MANAGEMENT

Shiv Construction LLP is driven by a dedicated team of professionals with strong experience across civil engineering, project management, site execution, supervision, and quality systems.

Our team combines the legacy of decades-long on-ground expertise with modern project execution practices.

Leadership

- Guided by experienced leadership carrying forward the legacy of Raghuvir Buildcon and Siddharaj Projects.
- Strong decision-making, planning capability, and commitment to maintaining quality and timelines.

Project Management Team

- Skilled project managers co-ordinating multi-disciplinary activities.
- Daily monitoring of site progress, resource allocation, and technical oversight.
- Efficient documentation, reporting, and compliance handling.

Technical & Engineering Team

- Civil engineers with hands-on experience in irrigation, canal, dam, and infrastructure works.
- Proficient in drawings, EPC Projects, BOQs, material specifications, and technical execution.
- Expertise in hydraulic structures, concrete works, earthwork, road works and embankment development.

Supervisory & Field Team

- Trained supervisors ensuring proper execution, quality checks, and safety compliance.
- Capable workforce experienced in concrete work, shuttering, steelwork, and finishing.
- Skilled operators handling machinery with precision and safety awareness.

Workforce Strength

- Well-balanced mix of experienced workers, operators, helpers, and technicians.
- Flexibility to scale manpower based on project size and timeline requirements.

OUR MACHINERY & EQUIPMENT

Shiv Construction LLP maintains a reliable fleet of machinery and equipment required for smooth, continuous, and efficient construction operations.

Earthmoving Equipment

- Excavators for bulk earthwork and canal excavation.
- Loaders and backhoe machines.
- Tippers and dumpers for material movement.
- Dozers for shaping, levelling, and embankment works

Concrete & Structural Equipment

- Concrete mixers and batching equipment.
- Vibrators, needle vibrators, and compaction tools.
- Shuttering materials and formwork systems.
- Cutting, bending, and reinforcement tools.

Survey & Measurement Instruments

- Automatic levels.
- Total station.
- Measuring tools for precision alignment and layout.

Transport & Support Vehicles

- Goods carriers for material delivery.
- Water tankers and utility vehicles.
- Mobile tools and generators.

Maintenance & Safety Tools

- Essential maintenance kits for machinery.
- Safety gear, barricades, signage, and PPE.
- Lighting equipment for extended work hours.

MECHANICAL RESOURCES & ASSETS

Item of Equipment	Requirement		Availability Proposal		
	No	Capacity	Owned/ Leased to be procured	Nos. / Capacity	Age / Condition
Hydraulic Excavator	9	0.80 to 2.10 Cum	9	0.80 to 2.10 Cum	Good
Tippers/Trucks	17	25 Mt./16 Cum.	17	25 Mt. / 16 Cum.	Good

PROJECT EXPERIENCE & MAJOR WORKS

COMPLETED PROJECTS (MAJOR WORKS)

Shiv Construction LLP and its predecessor firms – Raghuvir Buildcon and Siddharaj Projects – have successfully executed a wide range of irrigation, canal, dam, road, and infrastructure projects across Gujarat and other regions of INDIA. Our major executed works include:

- Canal lining and modernization for distributaries, minors, and sub-minors
- Large-scale earthwork and embankment development
- Dam rehabilitation and strengthening works
- Concrete structural works for hydraulic structures
- Road construction and infrastructure connectivity
- Water management and irrigation improvement components

WORK EXPERIENCE SUMMARY

Across all entities, the combined work experience includes:

- Execution of state and central government irrigation schemes
- Major canal repair and concrete lining works
- Dam strengthening and modernization under challenging site conditions
- Earthwork excavation, formation, and embankment development
- Concrete works including spillways, weirs, retaining structures, and canal structures
- Infrastructure works for government departments and development authorities
- Projects handled with complete physical and financial closure

With decades of execution capability, the team has handled projects ranging from small-scale improvements to large, multi-phase irrigation development.

MAJOR PROJECT HIGHLIGHTS

1. Dam Modernization & Strengthening Works

- Complete rehabilitation including concrete repairs, spillway strengthening, and embankment stabilization.
- Fully executed physically and financially.
- Delivered under strict technical supervision and tight timelines.

2. Canal Lining & Improvement Works

- CC lining of canals, minors, and sub-minors.
- Desilting, section reshaping, and repair.
- Improved water flow efficiency and system durability.

3. Irrigation Infrastructure Development

- Execution of new irrigation components.
- Structural concrete and earthwork.
- Enhanced water distribution capabilities across command areas.

4. Road & Access Infrastructure

- Internal and approach road construction.
 - Base preparation, levelling, and surface finishing.
 - Supporting infrastructure for irrigation and dam projects.
-

MAJOR PROJECT HIGHLIGHTS

Shiv Construction LLP its predecessor firms have successfully worked with:

- **Narmada Water Resources, Water Supply & Kalpasar Department. (NWRWS)**
- **Government of Gujarat.**
- **Sardar Sarovar Narmada Nigam Limited. (SSNNL)**
- **Karnataka Neeravari Nigam Limited. (KNNL)**
- **Hindustan Construction Company. (HCC)**
- **Larsen & Toubro. (L&T)**
- **National Highway Authority of India. (NHAI)**
- **Ircon International.**
- **Western Railway.**
- **Government Of Andhra Pradesh. (ISLMC)**
- **National Thermal Power Corporation. (NTPC)**

Our long-term relationships are built on trust, timely delivery and quality-focused execution.
